RESPONSIBLE CODING

Responsible means to be answerable and accountable for something. abeo's coding team is both *responsive* and *able* to navigate the coding challenges of today's medical environment so that you can maximize reimbursements and maintain compliance.

PROPER DOCUMENTATION

Coding begins with proper documentation. Our experienced staff is overseen by various levels of management and knows the importance of tracking errors and omissions, implementing controls to prevent errors, and education on proper documentation.

ACCURATE CODING

Our certified coders on average have 8 years of experience as certified medical coders and hired directly by **abeo**. They are trained and educated to demonstrate superior levels of expertise in specialty disciplines for ASCs and anesthesiology. Their expertise helps uncover missed revenue with the quick turn around time you expect.

FULLY COMPLIANT

Coding is a vital part of **abeo's** business, and that's never been more true than today. It's our coding staff's duty to protect providers and our company by adhering to all policies. Our billing and coding management works with our legal counsel to deliver the needed expertise in surgery center and anesthesiology specialty guidelines.

PEACE OF MIND

abeo provides ownership, administration and physicians with peace of mind. Investing in continued coding education for our coding staff and providing compliance training and guidelines for your team, is part of what you get with **abeo**.

Plus, our ICD-10 resources and AAPC approved "ICD-10-CM It's On The Way" internal training program demonstrate some of the many ways we're ICD-10-CM ready.

TURNAROUND TIME

In addition to our standard service and support for medical coding, **abeo** accommodates weekend and STAT turnaround requests should the need arise.

WE KNOW CODING.
