

MedSuite™

Anesthesia Billing Software from *abeo*

When you are looking for anesthesia billing software, look also at the company behind it. There is just no substitute for expertise, deep roots and strategic partnership.

For years, **abeo** has earned the trust of top anesthesia practices nationwide by delivering uniquely powerful coding and billing solutions like MedSuite. With **abeo**, practices are assured:

A single-minded focus.

abeo understands the many nuances and complexities of anesthesia billing. It's not just one specialty we focus on. It is the only one. MedSuite was built as an anesthesia billing platform from the ground up.

A strategic partner.

There is no other way to say it: We will be there when you need us. **abeo** is a national company with a local presence and deep roots in the billing industry. We understand your coding and billing challenges because we live them ourselves every day. We use that perceptive vision to help anesthesia practices grow, evolve and succeed.

Practical, real-life technology solutions.

The software we sell is the software we use. Because we need the same billing functionalities and efficiencies you need, we bake them into our solutions.

These are just some of the reasons why MedSuite, **abeo's** cloud-based billing software, is the most widely used anesthesia billing solution in the nation. Bring the power of **abeo** and MedSuite to your practice.

ABEO KNOWS ANESTHESIA BILLING.

Let us share our experience, strategies and solutions with you.

Experience the Benefits of MedSuite™

Anesthesia Billing Software from **abeo**

Generic tools simply do not work when you're up against the complexities of anesthesia billing. That's why **abeo** continually works to add depth and power to MedSuite's cloud-based platform.

Features include:

- ▶ **Faster response times.** MedSuite is not a traditional browser-based application. Instead, its rich application architecture (RIA) enables a robust desktop-like interface. It lets you move quickly and easily from field to field, and function to function.
- ▶ **Document imaging/workflow integration.** MedSuite offers the only fully integrated workflow management and document imaging solution available. That means coding annotations can be deployed straight to the charge entry function. EOBs can be separated by case or encounter for easier filing of secondary claims.
- ▶ **Surgery schedule reconciliation.** MedSuite is the only solution that lets you cross reference the surgery schedule against your billing. That way you can be certain you bill and collect for every case.
- ▶ **Clearinghouse integration.** Billers can work seamlessly from a single system, with automated claims, electronic remittance posting and eligibility processing. For example: ERAs can be automatically input overnight, with easily accessible adjudication messages down to case or line item levels.
- ▶ **Anesthesia-specific reporting.** MedSuite's underlying database was designed from the ground up with anesthesia in mind. As a result, clear views into valuable metrics are available through robust, flexible reporting that provide clear indicators of the financial health of your practice.
- ▶ **Security.** Because it handles more anesthesia claims than any other software, no in-house system can match the security levels built into the MedSuite environment. Plus, as a cloud-based solution, **abeo** manages all software backups, upgrades and other security functions for you — delivering peace of mind without the hassle.

abeo's MedSuite software is used in more anesthesia practice settings nationwide than any other anesthesia billing application available. Discover the difference **abeo's** billing software and expertise can make for your practice.
